Pure Sunless Reserve Stock Tanning Mist

Reserve Stock's luxurious airbrush tanning formula develops spectacular looking tans. Skin stays beautifully bronzed for about 7-10 days while color fades away gently with Flawless Fade™ technology.

Pure Sunless Tahitian Tea Tanning Mist

Experience a truly believable Tahitian beach bronzed body with NEW Tahitian Tea. This natural, island color is beautifully consistent on all skin types. This formula has a light invigorating scent of refreshing Spa Mint and is fortified with Antioxidants and Vitamins for supreme hydration.

Frequently Asked Questions

Q: How should I prepare for my spray tan session?

A: Use a good exfoliant and loofah sponge in the shower or bath the night before to remove dead skin cells. Shower and shave just before your session if possible. Wear loose fitting clothing to the salon, preferably not white to avoid staining from the indicator.

Q: What can I wear during my spray tan session?

A: Wear whatever makes you comfortable, whether that be a bathing suit or nothing at all. We can provide you with disposable underwear and bras as well. Mostly it depends on whether you want tan lines or not!

Q: How should I care for my spray tan?

A: Wait 8 to 12 hours after your tanning session before taking a shower. Apply a good amount of moisturizer both in the morning and at night after your tanning session. Well moisturized skin ensures a longer life for your airbrush tan. Avoid baths, swimming, and sweating as much as possible to extend the life of your tan.

Q: How long will it last?

A: Your tan will last 7-10 days if you follow the recommendations we have listed above.
